

BPL can bring real broadband to areas like mine. An area where the Telco's and Cable Co's will not offer broadband because it is not cost efficient.

I understand that possibly interference issues may exist, but we are talking about interfering with ancient technology, that in my opinion is nothing more than a hobby.

I'm sure there are many who feel the same way I feel. All rural America is asking for is broadband whether it be Telco, Cable Co, or BPL.

Thank you.
